

THE BENEFITS OF CREDIT INSURANCE

Risk prevention

With a database of information on 80 million companies worldwide and 340 underwriters and credit analysts we assess our clients' prospective customers and monitor their existing ones, keeping them alert to changes in their financial health. With the guidance of Coface our clients are able to review existing relationships and focus their efforts on financially healthy customers.

Improved cash flow

Your cash flow is a powerful yet vulnerable resource and you know the importance of protecting yourself against unpaid invoices and insolvencies, which can impact your cash flow and pose a threat to your company. Credit Insurance helps companies avoid risks and replaces cash flow should the worst happen and a customer insolvency or non-payment occur.

Business Development

By entrusting the protection of your debtor book to credit insurance you can focus your time on business development. Additionally Coface offer a worldwide analysis of country, sector and company credit risk in real time giving you the freedom to pursue your growth strategies with confidence.

Secured Trade Finance

Financial institutions look more favourably on secured receivables so a credit insurance policy could potentially improve your credit options and borrowing terms.

Helping businesses take the right decisions

Supplier Relationships

You may be able to negotiate favourable terms with your suppliers as a credit insurance policy reduces the impact of a bad debt on them and potentially the whole supply chain.

Enhanced Credit Management

A credit insurance policy will bring structure and discipline to your credit management.

Peace of Mind

Credit insurance is there to help you prevent and mitigate your trading risks, so you can develop your business with the knowledge that your accounts are protected. Credit Insurance is there to help you take the right decisions.
